* Per Prospectus dated August 1, 2019, as amended. Reflects all fee waivers currently in effect. Fee waivers may not be amended, rescinded or terminated before July 31, 2020 without the consent of the Fund's Trustees.

Investment Process

The Fund generally invests in domestic stocks with a market cap of up to \$5 billion at the time of purchase. The investment process for the Fund combines both quantitative and fundamental techniques. The Fund's approach is primarily "bottom up," searching for individual stocks with strong, undervalued cash flows, regardless of location or industry. The Fund uses proprietary computer models to rank publicly traded small cap companies on the basis of value and to narrow the universe down to 200 to 400 deserving of further consideration. The Fund supplements the screening process by performing in-depth financial and fundamental analysis. Risk controls are also employed to prevent the Fund from concentrating its investments in any particular industry sector.

Portfolio Management

The Fund is managed by Polaris Capital Management, LLC, a Boston, Massachusetts money manager that specializes in the management of global, international and domestic equity portfolios.

PERFORMANCE

as of June 30, 2019

Average Annual Total Returns at Net Asset Value

	Unannualized		Annualized			
	Q2	Calendar YTD	1-Year	3-Year	5-Year	10-Year
Ordinary Shares	1.54%	13.31%	-3.95%	8.54%	4.61%	11.08%
Institutional Shares	1.60%	13.48%	-3.60%	8.91%	4.93%	11.39%
Russell 2000 ¹	2.10%	16.98%	-3.31%	12.30%	7.06%	13.45%

¹The Russell 2000 Index is a market capitalization-weighted index of 2,000 small company stocks. It is widely recognized as representative of the general market for small company stocks. Index returns assume the reinvestment of dividends and, unlike Fund returns, do not reflect any fees or expenses. You cannot invest directly in an Index. For comparative performance purposes, the beginning date of the Index is 08/03/92.

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost.

For the most recent month-end performance, visit the Fund's website at www.peartreefunds.com. Before investing, carefully consider the Fund's investment objectives, risks, charges and expenses.

ABOUT PEAR TREE FUNDS

For over 30 years, Pear Tree Advisors, Inc. has offered investors access to well-respected institutional investment firms. Pear Tree Advisors has built its reputation as a manager-of-managers for the Pear Tree Funds. The funds are 100% sub-advised and utilize time-tested investment strategies.

Pear Tree Advisors was founded in 1985. The Pear Tree Funds offer six mutual funds:

Fund - Ordinary Shares	Ticker Symbol
Pear Tree Polaris Small Cap	USBNX
Pear Tree Axiom Emerging Markets World Equity	QFFOX
Pear Tree Polaris Foreign Value	QFVOX
Pear Tree Polaris Foreign Value Small Cap	QUSOX
Pear Tree Quality	USBOX
Pear Tree PNC International Small Cap	QISOX

A WORD ABOUT RISK

Small company stocks may trade less frequently and in a limited volume, and their prices may fluctuate more than stocks of other companies. Small company stocks may therefore be more vulnerable to adverse developments than those of larger companies. The Fund may invest in issuers in the real estate industry. Changes in real estate values or economic downturns can have a significant negative effect on these issuers. The Fund may invest in foreign issuers that trade on U.S. stock exchanges. These issuers may be subject to special risks including different corporate governance rules and bankruptcy laws.

Beta	0.98
Information Ratio	-1.19
R-squared	96.60
Standard Deviation (Fund)	16.99
Standard Deviation (Benchmark)	17.11

A WORD ABOUT RISK (CONTINUED)

The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than diversified funds. As a result, a decline in the value of the securities of one issuer could have a significant negative effect on the Fund. The Fund may have significant investments in one or more specific industry sectors, subjecting it to risks greater than general market risk. For example, adverse news from just one or two companies in a particular industry can hurt the prices of all stocks in that industry.

Definitions

Beta is a measure of the volatility of a fund relative to the overall market.

Information Ratio is the measure of portfolio management's performance against risk and return relative to a benchmark or alternative measure.

R-squared represents the percentage of the portfolio's movements that can be explained by the general movements of the market.

Standard Deviation is a statistical measure of the historic volatility of a portfolio.

Market Capitalization is the total market value of a company's stock, achieved by multiplying the market price of a single share by the total shares outstanding.

Median Market Capitalization of a fund's equity portfolio provides a measure of the size of the companies in which an equity fund invests.

Price to Book Ratio is a ratio used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Price to Earnings is the relationship between a company's earnings and the share price and is commonly used to value a company's stock. The P/E ratio is calculated by dividing the current market price per share by the earnings per share. A stock's P/E ratio provides a sense of its value in relation to its earning power.

Weighted Average Market Cap is the average of the market capitalizations of the companies in the portfolio weighted by the size of each company's position within the portfolio.
