| Pear Tree Polaris Foreign Value | QFVOX |
| Pear Tree Polaris Foreign Value Small Cap | QUSOX |
| Pear Tree Polaris International Opportunities | QISOX |
| Pear Tree Polaris Small Cap | USBXN |
| Pear Tree Quality | USBOX |

IMPORTANT INFORMATION ABOUT PERFORMANCE

¹The MSCI World Index captures large and mid-cap representation across 23 Developed Markets (DM) countries. With 1,410 constituents as of 09/30/2024, the index covers approximately 85% of the free float-adjusted market capitalization in each country. You cannot invest directly in an index. For comparative performance purposes, the beginning date of the Index is 09/01/2017. The MSCI World Index is maintained by MSCI Inc.

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost.

For the most recent month-end performance, visit the Fund's website at www.peartreefunds.com. Before investing, carefully consider the Fund's investment objectives, risks, charges and expenses.

Investment Process

The Fund invests in companies the management team believes solve environmental and related social challenges, seeking to provide attractive financial and social impact returns. The Fund invests in public equities with full alignment to the U.N. Sustainable Development Goals. Investments are made across nine environmental themes, providing clean technology diversification in companies with revenue and earnings growth greater than the broad equity market, in companies exhibiting effective capital allocation and strong profitability.

Buy and Sell Discipline

The Fund is concentrated, typically owning 35-45 equity holdings, in growth companies which provide solutions to the world's environmental challenges. Stock selection is based on rigorous fundamental company analysis and a valuation process that is informed by the portfolio management team's thematic industry assessment. The Fund has generally lower turnover, with half from existing positions. Position sizes average 2-3%, and are diversified across themes, geographies and industries. Risk management and assessment is integral to portfolio construction, with position sizes determined by industry maturity, liquidity, individual security volatility and the management of price and profit expectations.

Portfolio Management

The Fund is managed by William Page and Robert Uek of Essex Investment Management, LLC. Essex is an independent, employee-owned firm with over a 40-year history of growth equity investing. Page and Uek have almost 60 years of combined institutional investment experience. The portfolio management team has been managing clean technology portfolios for over 16 years, with the first listed impact strategy in North America.

A WORD ABOUT RISK

Investing in foreign markets, particularly emerging markets, can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market or economic developments and can perform differently than the U.S. market. The fund's exclusion of investments in companies other than clean tech may adversely affect the fund's relative performance at times when those other types of investments are performing well.

For information about the Pear Tree Funds, call (800) 326-2151 to obtain the funds' prospectus or visit www.peartreefunds.com. Before investing carefully consider a Fund's investment objectives, risks, charges and expenses. Please read the prospectus carefully before you invest or send money.

Market Capitalization

| In millions | |
|--|----------|
| Weighted Average Market Capitalization | \$26,573 |
| Median Market Capitalization | \$6,760 |

Risk Measures (3 years)

| Ordinary Shares vs. MSCI World Index | |
|--------------------------------------|--------|
| Beta | 1.38 |
| Information Ratio | (0.90) |
| R-Squared | 65.44 |
| Standard Deviation (Fund) | 28.95 |
| Standard Deviation (Benchmark) | 17.01 |

Definitions

Beta is a measure of the volatility of a fund relative to the overall market.

Information Ratio is the measure of portfolio management's performance against risk and return relative to a benchmark or alternative measure.

R-squared represents the percentage of the portfolio's movements that can be explained by the general movements of the market.

Standard Deviation is a statistical measure of the historic volatility of a portfolio.

Market Capitalization is the total market value of a company's stock, achieved by multiplying the market price of a single share by the total shares outstanding.

Median Market Capitalization of a fund's equity portfolio provides a measure of the size of the companies in which an equity fund invests.

Price to Book Ratio is a ratio used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Price to Earnings is the relationship between a company's earnings and the share price and is commonly used to value a company's stock. The P/E ratio is calculated by dividing the current market price per share by the earnings per share. A stock's P/E ratio provides a sense of its value in relation to its earning power.

Weighted Average Market Cap is the average of the market capitalizations of the companies in the portfolio weighted by the size of each company's position within the portfolio.
